

110V DIAPHRAGM TO INCLUDE O-RING

In accordance with our mission to make a difference in the lives of those we serve, we continually use customer feedback to make strategic improvements to our products.

This product notice is to inform you that all end items and repair kits that contain a 110V diaphragm will now also come with an O-ring (part #7508V).

We recently received reports of the 110V experiencing failure. After testing, we have determined that the addition of the #7508V O-ring is the appropriate solution for resolving the issue.

This change is immediate and will be seen in all orders that contain the 110V diaphragm. It requires no further action.
